

Forests For Fish Forum

Lake Superior Food Web – Exploring the Inputs and Depths

When: Tuesday, April 16, 2019, 5 to 9 PM EDT

Where: River Rock Lanes and Banquet Center, Ishpeming

Featured Speakers:

Brandon Gerig

Dynamic linkages between forest and lake: The Lake Superior watershed

Brandon Gerig, PhD, is an Assistant Professor of Fisheries Biology in the NMU Biology Department. He has studied fish populations in streams, rivers, and lakes in the Great Lakes region, the Colorado River and Alaska

Thomas Pratt

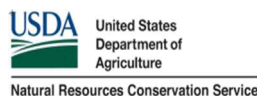

Everything is connected – life in the nearshore zone of Lake Superior

Thomas Pratt, PhD, is a Research Scientist, Department of Fisheries and Oceans (Canada). Tom is a fisheries ecologist who works on a variety of Great Lakes issues, conducting research throughout the Great Lakes basin.

Shawn Sitar

Fishes in the abyss -- the offshore ecosystem of Lake Superior

Shawn Sitar is a Michigan DNR fisheries research biologist specializing in lake trout and lake whitefish in the upper Great Lakes. He also is the project leader for the Research Vessel Lake Char, and has led research expeditions to the far reaches of Lake Superior (on the surface and below).

Questions? Contact Gary Willis, DNR at (906) 353-6651 willisg2@michigan.gov
